

RAW MAGIC

PRESS RELEASE

RAWMAGIC.COM REVEALS SURPRISING POWER OF NEW LIFESTYLE

November 10, 2009, Richard Cavalli, Executive Chairman and co-founder of CeMines, Inc., (www.cemines.com) a molecular biotechnology company developing early detection blood tests for lung, breast, colon and other cancers and partnered through an exclusive worldwide licensing agreement with Ortho Clinical Diagnostics, a Johnson & Johnson company, launched his solution to the world's healthcare crisis. It's called Raw Magic.

Cavalli says. "The Raw Magic lifestyle can greatly reduce healthcare costs within only a few short months of implementation because it quickly strengthens the immune system and begins repairing serious problems in the body like diabetes, obesity, heart disease and autoimmune disease. It also increases productivity because it significantly raises mental clarity and energy."

Cavalli, 66 years old, practices the raw magic that he preaches and has recently transformed himself from being unhealthy, feeling anxious and depressed and relying on several prescription medications, to a new life where he not only looks and feels 20 years younger, but he is now super healthy and takes no medications of any kind. All he does is simply eat the proper foods we are designed to eat and exercise his mind and body every day. The long list of results are staggering. See www.rawmagic.com.

"In addition to being super healthy, I am now physically the strongest I have ever been and my mind is the sharpest it has ever been." "My depression and anxiety have disappeared." "When people see me for the first time since I started my new journey less than one year ago, they say that I look 20 years younger." "My wrinkles have vanished, my skin has cleared up and tightened, my body is lean and strong and I radiate confidence and energy."

"And the cost to me was zero." "All I had to do was eat the right kind of foods that were not heated and exercise my body and mind for one hour almost every day." That's not a high price to pay for being healthy and happy.
